

# Thermodyn™

*"Where your success is Sealed"*

Thermodyn Corporation has been manufacturing coated textiles and high performance substrates since it began operations back in the late '70's. Below are a few examples of the polymer types and industrial textile applications available from Thermodyn.

## Product Line Card

<b>Polymers</b>
DuPont Viton® FKM
DuPont Viton® (Blue, Brown, White FDA)
DuPont Viton® G, F, & GFLT Nylon
Viton® Caulk
AFLAS®
EPDM (Sulfur and Peroxide Cure)
FDA Grade versions of FKM & EPDM
Neoprene (CR)
Hypalon® (CSM)
Nitrile (Buna N, NBR)
Silicone (MQ, Red)
Hydrogenated nitrile (HNBR)
Fluorosilicone (FVMQ)
Natural Rubber (NR)

<b>Base Substrates</b>
Polyester
Cotton
Nylon
Aramid Blends
Kevlar® and Nomex®
Woven & Knitted fabrics
Fiberglass
Wire Insert Fiberglass
Knitted Wire Mesh

### **Ask about Thermodyn's Viton® materials to the following specifications**

- Mil R 83248 Ty 2 Cl 1 and AMS 3216
- Mil R 83248 Ty 2 Cl 2 and AMS 3218
- U2A S24/G24, S23/G23
- Compliant with DuPont's™ gasket code U2A, S26/G26
- FDA Approved Sheeting to FDA 21CFR 177.2600,(C),(4),(1)

With a wide variety of polymer types and different substrate options, Thermodyn's engineered materials perform in many demanding applications.

Thermodyn is the trusted name in high performance polymers and coated fabric industries.
